

Next roll some small purple spheres and flatten them over the body of your creature. These are his scales.

After this we can begin work on his frill! Using the purple plasticine make some 'ear' like shapes for each side of his head. Attach them to his head but be careful not to smudge your work!

These can then be decorated with pink dots or lines. Roll out a very small length of plastecine for his tongue!

Very carefully attach his tongue to his mouth, I have given him a forked tongue like a snake but you can go with any shape!

There we have it! One snake thing!
